EXECUTIVE SUMMARY

Enthusiastic, eager to Learn currently Cybersecurity student at CVUT Prague. Studying third year of bachelor's degree on CTU in Prague. I'm mainly focusing on Penetration testing and red teaming, due to my excitement of "breaking" into different systems. Always trying new things and educating myself on different Cybersecurity branches such as IoT and Mobile apps security. My biggest advantage is, that I'm hard working, result focus, self-motivating and eager to learn new things. I'm really committed to every new challenge I face, not giving up until its completed. Most of the time you'd find me tinkering with hardware or learning about new pen testing techniques.
